DETAILED ACTION

1. This office action is in response to applicants' communication filed on September 21, 2005. Amendments to the specification, claims 95, 96, 98, 99, 101-104, 106-109, 111, 112, 117 and 125, cancellation of claims 113, 115 and 116 have been entered. IDS filed on February 13, 2003 and September 21, 2005 have been considered and acknowledged. Corrections to the drawings have been entered. Formal drawings are required when the application is allowed. Double Patenting rejection and rejections under 35 USC § 101 are withdrawn in view of the amendments. Claims 95-112, 114, and 117-126 are pending in the application. The rejections are stated below.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

3. Claims 95-112, 114, and 117-126 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Taken as a whole the claims recite an undue multiplicity of claims by virtue of the unreasonable number of claims presented would tend to obfuscate, confuse, and becloud the claimed invention. Because the examiner believes that in his judgment that twenty (20) claims are sufficient to properly define applicants' invention, applicants are required to select certain claims, not to exceed twenty for examination on the merits of which no more than six are independent claims, See M.P.E.P. 2173.05(n). To be complete **the non-selected claims must be cancelled** or the applicant(s) must present appropriate arguments as to why the above rejection is in error. Note also the new excess claim fees effective 12/8/04 as evidence of what is considered

to be unreasonable.

It is further noted that it would appear that a multiplicity of inventions also appear to be involved and the applicants are requested to group their selection accordingly to read on a single invention that was examined in the last office action. The applicant should group the claims according to what he believes to be distinct inventions that may be restricted in a subsequent action.

Applicants are being afforded the courtesy of a written response due to the complexity of the case.
